Globe District Mining News.

[From the Silver Belt.] They will commence to crush ore in the Isabella mill in a few weeks. It is expeted that the Golden Eagle mill will be running by the first of

October. Five bars of silver, one of them being 984 degrees fine were shipped from the Baldwin mill on Monday.

Mrs. Munson has a lot of Mexicans arrastraing ore from a claim of hers at to the ton.

The material which was wanted for has all arrived, and it will soon be hours, there is between four and five over \$500,000 for their mines, and busy pounding ore. There are 300 tons of ore, which in San Francisco sum balf as great in erecting works to The La Plata has been sold to Bald-

win & Co. for \$75,090. The sellers win & Co. for \$10,090. The series a win & Co. for \$10,090. The series a were Messrs. Newland, Riggs and Discusses peculiar to women and Campbell. It is one of the Richmond there lies 120,000 pounds on the metal ore from the Mexican group of mines We have been informed by good au-

thority, that the north shaft of the Silver Nugget has cut the vein 60 feet below the first level, and that the same rich ore was found. This being some distance below the water level, is conclusive evidence that the ore continues. We have authority for stating that

M. A. Baldwin has procured a lease of the old Blue-Bird mine. A force of workmen under Jack McGowan are already at work. This mine has produced some excellent ore, but has been so mismanaged that it grew into disfavor. McGowan will pull it up again,

They have made important devopments in the 1000-foot level of the Mack Morris mine. The cross cut from the winze shaft cut the vein on the 100 foot level on Friday, and it shows shows an unlimited quantity of highfour feet thick of fine ore. From the cross cut the ore leads east and west, and establishes the fact that the Mack Morris is a Bonanza mine. We con. disclose the "welcome green," and at gratulate Mr. Baldwin on his good all times during the day visitors may luck, and his associates in having a be seen hunting "specimens," which man possessing such excellent judgment looking after their interests.

> Making Good Indians. [From the Arizona Silner Belf.]

Col. Tiffany has had plans drawn by Mr. Mills of Globe, for an Industrial School to be erected at San Carlos Already 160 acres are cleared for the purpose. The probable cost will be \$10,000. The school rooms proper are detached from the main building, and are each 30 feet by 30-one for the boys and another for girls. The prinpal edifice is erected aroung an oper court or square, and all its doors open into it. The court is 63 feet by 72, There is a dormitory or sleeping room for boys 18 feet by 64, and one for girls on the opposite side of the court of the same size. The dining room is 18 feet by 50, kitchen 18x24, and a lava tory or bath room 18x6. In the cour there will be a well. The teachers building is two stories high (the others only one story', and contains eight rooms 14 feet square. A passage-way runs through this building, and the upper story is reached by a flight of easily asceding stairs. The means of egress from the square is by two rates, one on each side of the teachers' uilding, and a door opening into the afore named passage way. The outside measurement of the main building is 106x118 feet. There is a clear pace of 100 feet between the school ouse and that of the teachers. Col. Tiflany is establishin a record for himself as an energetic, far-seeing man, and bids fair to become one of the best and most popular agents that the San Carlos reservation has had. Pinalis in connection with the mine by The policy of building this school is most commendable-it ought to be caster to train a young Indian than

Affairs at Silver King.

[Correspondence of the Silver Belt.] During the past six months or so considerable work has been done on the property of the Northern King Mill and Mining Company, preparing pumps, which, under the management and the engine started about three other serious injuries. Yet he suco'clock. Everything worked so satisfactorily that when the whistle blew at

six o'clock, p. m., it was not a dry one. The shaft at which the machinery is placed is 156 feet in depth, (with considerable drifting) being filled with water to 60 feet of the surface, necessitated a steam pump. It is now at work, and sends up a little creek of water at every stroke; yet the company will not grumble if it takes its utmost capacity to keep the mine clear. They are very reticent about the object of this work and expenditure on the Northern King, but there is no doubt it is their expectation to strike the 350-foot bonanza of the Silver King, which is close to their line, and accepting Messrs. Swain and Will iam's report of December 25th, 1876,

as correct, must run right through their ground. The Silver King is still looming up. They have considerably increased the number of underground miners, and continue to send up quantities of rich ore from their bonanza. Their new machinery does efficient work, and the improvements on the dump facilitate labor; even the Superintendent may indulge in a lazy fit, as his office in

telephone. A good deal of mining and assess. ment work is being done in this disand seeking for employment.

An lown Prince. Bob Burdette has got a two year old boy. He is a smart boy, at least his father thinks so, for this is what he

and wouldn't quit then if it didn't grow dark. He is very Musy. Deserved Prosperity.

## A GOOD DELEGATION

Elected to the Republican County Convention on Saturday Night.

At the meeting of the Republican Club, Saturday evening last, there was a large attendance, the Court House being comfortably filled. The only business of importance transacted was the reception of the reports of the several committees appointed at the preceding meeting.

A pleasant occurrence of the evening was the visit of Hon. M. W. Stewart who was greated with a genuine and continue ! round of applause. As Le entered the hall, Col. Toole, who ocupled the clour, advanced half way to the door, and taking Mr. Stewart by President's table, where the Colonel Another big strike of chlorides and gracefully introduced Mr. Stewart to the audience as " our next Delegate to Congress. This was recived with renewed applause, which only ceased Farley & McCordy to sink 25 feet long enough to allow Mr. Stewart to lindt his visit to a few minutes; but he promised at some future time to ad dress the Club on the issues of the day

Upon the retirement of Mr. Stewart the Club adjourned, and the meeting was called to order as a caucus for the election of delagates to the Republi Frank Riggs recently sold the La can County Convention to be held on Plata mine in Richmond Basin to the 20th inst Col. A Crazy Duke.

Maynard. From the bottom of a 10- ings in London were of the most sinfoot shaft was taken some rock that gular kind. He fived at Brunswick house with an enormous establishment of servants and horses, where h good strong ledge for the entire length affected to consider himself a sover eign prince an I above the law. Judgment having been obtained against him for some debt which he refused to pay, the sheriff's officers obtained admission by a stratagem. An immense iron chest, containing the duke's food, being brought inside the gates with due precautions-for he afground for the reception and the build- feeted to dread poisoning-the officering of their steam hoisting works and rushed in with it. The alarm was caised. The duke appeared with his pistois. Men and blood-hounds were of Mr. N. B. Lawson, Superintendent, set on the unfortunate officers, who were completed yesterday afternoon, were flung out with broken legs and

> ceeded in obtaining £1000 damages for violation of domicile. In 1851 he left England suddenly for Paris, choosing as an eccentric mode of conveyance Mr. Green's bulloon, the Nas san, in which he ascended from Vaux hall. But in 1864 this satrap was to receive a severe blow. His daughter had married against his wishes the Count de Civry, and had, moreover, changed her religion. With strange rancor he refused to forgive, see or support her, and after many ineffect ial advances she had to appeal to the French courts. When he saw that in spite of all his protests a French court cas going to entertain a question Lager Beer at Wholsale & Retail which referred to Brunswick, he suddenly broke up his vast establishment, and taking all his bonds and selling his French stock, left nothing to seize and returned to the Hague where he lived two years. Then, growing weary of his banishment, he returned to Paris, and under the advice of counsel invoked the French laws. which after a series of appeals, were in his favor. The duke, therefore, triannied, and was once more estab-
